INTERIM SUPPLY SERVICE**

---

**1. Nature of Service**

Utility would provide electric power and energy on an interim basis to meet Customer's electric power and energy requirement as provided below. Utility would supply Delivery Services along with the interim supply of electric power and energy.

**2. Availability**

Utility would provide Interim Supply Service to a Customer taking Delivery Services under SC 110 if the Customer's Retail Electric Supplier ceases to provide power and energy service to Customer for any reason, not the fault of Customer. Examples of occurrences that would result in Utility providing service under this Rider ISS could include:

- (a) RES goes out of business;
- (b) RES notifies Customer or Utility that it will no longer provide service to Customer even though it has a contractual obligation to do so;
- (c) The Commission cancels, revokes or rescinds the RES's Certificate of Service Authority;
- (d) Customer's RES or TSA loses a license, certification or other authorization from the FERC necessary for the RES or TSA to be eligible for service under the applicable OATT;
- (e) Utility denies service to Customer's RES or TSA for not complying with the applicable OATT;
- (f) Utility disconnects Customer's RES from its transmission system for not complying with an interconnection agreement between Utility and the RES; or
- (g) Utility terminates service to Customer's RES under Section 4.C. of SC 150, and Utility does not receive a new Enrollment DASR for Customer in time to enroll Customer with another RES.

**3. Term of Service**

- (a) Utility will deem that Interim Supply Service has commenced on the date Customer's loss of service entitles Customer to service under the terms stated in this Rider ISS, provided it is no sooner than three days before Utility receives actual notice of Customer's loss of service.
- (b) Utility will provide service under this Rider ISS to Customer up to Customer's second consecutive regularly scheduled meter reading date following the start of Interim Supply Service, at which time Utility will place Customer on Bundled Service as provided in Section 10.C. of SC 110, unless Customer either starts service with a new RES that has complied with the requirements of Section 11 of SC 150, has already elected to return to Bundled Service, or taken service under Rider PPO.

**4. Rates**

In each billing period, Utility will bill Customer the following charges:

- (a) Firm point-to-point service at the maximum daily rate per kW applicable under the applicable OATT;
- (b) Ancillary Services charges under the applicable OATT, excluding energy imbalance charges;
- (c) All applicable charges for Delivery Service under Section 6 of SC 110;
- (d) The hourly price for electric power and energy delivered to Customer set forth in Sections 5(a) and 5(c) of Utility's Rider DA-RTP;
- (e) An Administration Fee equal to ten percent (10%) of the energy component of the hourly price in Section 5(a) of Utility's Rider DA-RTP.

**5. Billing Provision for Residential Customers**

A Customer eligible for Residential Service may pay a portion of the charges under Rider ISS as provided below:

- a) Utility will compare the calculated Rider ISS charges to an amount based on the average base revenue per kWh for the Customer's TC Group (Factor BRc in Utility's Rider TC) times the number of kWh delivered to Customer under Rider ISS ("Base Revenue").
- b) If the Rider ISS charges are more than \$25.00 higher than 120% of the Base Revenue amount, Utility will bill the Customer 120% of the Base Revenue amount in the current billing period. The remaining balance of ISS charges will be billed to Customer in three equal installments in the three billing periods following the termination of service to the Customer under Rider ISS. An interest charge of 1.5% per month will be added to the outstanding balance of Rider ISS charges. Customer may at any time choose to pay the entire outstanding balance.
- c) If the Rider ISS charges are not more than \$25.00 higher than 120% of the Base Revenue amount, Utility will bill the Customer the entire amount of Rider ISS charges in the current billing period.
- d) If Customer subsequently commences to receive service from a new RES while continuing to make payments to Utility on outstanding Rider ISS balances, Customer will not be eligible for the credit provided for under Section 6.H(10) of SC 110 until the outstanding Rider ISS balances have been paid in full.

**6. Conditions of Service**

- (a) Customer that receives Interim Supply Service from Utility immediately following the termination of service from a RES for any reason, may not take electric power and energy from the same RES for one year from the date the Interim Supply Service began.
- (b) This Rider ISS is subject to Utility's Tariffs, as applicable, including SC 110, SC 150, Terms & Conditions, and Rules & Regulations.

PARTIAL REQUIREMENTS SERVICE**

---

**1. Nature of Service**

Utility provides electric power and energy to non-residential Customer to serve the portion of Customer's electric power and energy requirements specified in a written contract between Customer and Utility.

**2. Availability**

Partial Requirements Service from Utility is available at Customer's request to any non-residential Customer taking Delivery Services under SC 110.

- (a) Utility will not supply service to Customer under this Rider PRS until Customer has entered into a written contract with Utility, specifying, among other things, how Customer's electric power and energy requirements not supplied by Utility under the terms of this Rider PRS, will be allocated between any PPO service taken and any service supplied by a RES under SC 110. The contract must also specify how subsequent increases in Customer's Distribution Capacity and Maximum Demand are to be allocated between or among these services. In addition, the contract must specify the order of hourly deliveries when Customer is taking service through the same meter at a Point of Delivery. Any allocation to PPO Service that includes NonFirm PPO Service, must be governed by the contract required by Rider PPO.
- (b) Customer must provide at least 30 days written notice prior to commencing service under this Rider.

**3. Term of Service**

The minimum contract term for service under Rider PRS is one year.

---

**4. Rates**

In each billing period, Utility will bill Customer the following charges:

- (a) An administrative fee based on whether the Customer's metering is non-interval or interval:

(i)	Non-interval meter	\$ 80.00
(ii)	Interval meter	\$100.00
- (b) Charges for firm point-to-point service at the maximum monthly rate per kW under the applicable OATT;
- (c) Ancillary Services charges under the applicable OATT, excluding energy imbalance charges;
- (d) All applicable charges for Delivery Service under Section 6 of SC 110;
- (e) An hourly price for electric power and energy delivered to Customer under this Rider equal to 110% of the energy component of the hourly price in Section 5(a) of Utility's Rider DA-RTP.

**5. Grandfathering**

Customer taking a portion of its electric power and energy requirements under Bundled Service on the effective date of this Rider pursuant to Section 13 of SC 110 as in effect at the time Customer's contract governing such service was entered into, will be allowed to continue to take the Bundled Service until expiration of the contract required by Section 13 of the SC 110 then in effect.

**6. Conditions of Service**

This Rider PRS is subject to Utility's Tariffs, as applicable, including SC 110, SC 150, Terms & Conditions, and Rules & Regulations.
